PROFESSIONAL SUMMARY

Frontend web developer with hands-on experience in designing and developing responsive, user-friendly applications using **React.js**, **JavaScript (ES6+)**. Completed a **225-hour FullStack development course** covering **modern UI frameworks**, and **RESTful API integration**. Improved **page load speed by 35%** through code-splitting, lazy loading, and image optimization. Implemented **cross-browser compatibility** and **mobile-first design**, ensuring seamless performance across devices. Delivered weekly **Agile sprint releases** during internship, boosting overall UI efficiency by **25%**.

EXPERIENCE

CODSOFT | FRONTEND DEVELOPER INTERN | MAY 2024 - JUNE 2024

- Designed and developed responsive web interfaces using HTML, CSS, and JavaScript, improving user engagement by 30%.
- Collaborated with backend developers to integrate APIs, enhancing data synchronization speed by 20%.
- Optimized UI performance and reduced layout shift, improving page load responsiveness by 25%.

PROJECTS

EVENT MANAGEMENT SYSTEM (FULL STACK WEB APP)

SelfDirected | 2025

- Built a scalable event management platform using React.js, Node.js (Express), and MySQL with Sequelize, reducing manual coordination by 70%.
- Integrated secure JWT-based authentication with role-based access control for users and admins, enhancing data protection and access governance.
- Designed an interactive Admin Dashboard with dynamic Chart.js visualizations to track user growth, bookings, and event performance in real time.

E-COMMERCE (DEMO WEBSITE + PETEASE) SelfDirected | 2025

- Developed full-stack platforms using Angular, Express.js, with RESTful APIs and RxJS state management.
- Simulated a backend using JSON Server and integrated authentication.
- Supported 1,000+ product entries, and maintained 99% uptime.

SENTIMENT ANALYSIS OF INCOMING CALLS FOR HELPDESK

Pillai HOC | 2025

- Engineered FastAPI microservice combining Hugging Face Transformers and Librosa features.
- Trained RandomForest and transformer classifiers on 10,000+ samples; achieved 82% accuracy.
- Utilized a custom audio-text dataset for model training and validation; improved contextual sentiment interpretation.

HUMAN POSE ESTIMATION Academic Assignment | 2023

- Designed OpenCV and MediaPipe pipeline to detect 33 body landmarks at 20FPS with <200ms latency.
- Visualized joint angles for real-time posture analysis; improved detection precision by 18%.
- Packaged the solution into a Python module with a Tkinter-based UI for live demonstrations.
